

P.A.T. Math Night

“We remember 10% of what we hear, 30% of what we see, and 90% of what we DO!” J. Piaget

Before children can really begin to learn new math concepts and skills, they first need a strong concrete understanding of math. Real life experiences and hands-on math is very important to ensure that children truly grasp abstract concepts. Using a variety of math manipulatives or tools, can make learning math a great deal more fun! During this P.A.T. workshop, you will have the opportunity to learn and participate in math activities that will have your child doing, thinking, and talking MATH!

Any questions: Call Diane Kelly at 257-0578 Ext. #5570
