

# MULTIPLICATION MANIA

Is your child still having a bit of trouble learning those "Multiplication Facts?" Has learning them NOT been a load of fun....like it should be? Well, then it's time to for you and your child to have some fun with "Multiplication Mania!" This P.A.T. Workshop will review the concept of multiplication and then it's time to sing the "Times Tunes," learn some great mnemonic devices (memory tricks), and play fun multiplication games to reinforce skills! Hands-on activities are essential for the understanding of ANY Math concept. Children really do learn by "*doing*."

If your child is just learning multiplication, or needs some skill refreshing, this is THE class! Just a side note: When I was a classroom teacher, multiplication was one of my very favorite concepts to teach! FUN!
