

Science Education for the Youth

8 WEEK PROGRAM

for high school juniors and seniors

Experience what it's like to do research in a neurogenetics lab!

In this program, you will:

- Analyze, understand, & manipulate science's natural phenomena
- Learn and perform research techniques
- Isolate, digest, amplify, & quantify DNA
- Introduce DNA into cells, let the cells grow, & view fluorescent proteins
- View & interpret brain sections
- Read peer-reviewed articles

You will learn how to prepare resumes for STEM-related careers, learn ways to contact Professors about joining a research lab, and develop skills such as critical thinking, teamwork, problem solving, and communication which are vital to all fields and careers.

Program will run on Fridays from 3-7pm and Saturdays from 1-5pm.

For more information on the program or to apply, please contact us at: sefty@unlv.edu

Deadline for application: October 6th.
